4. **Open Finder** and **navigate to the Downloads** folder. You should see a file named **VMware-Horizon-Client**. You will want to **open** this file.

5. If you would like to proceed you will select **Agree**. It will open the file and should end with the opening of a VMware Horizon Client window.

6. *To install*, switch back to the **Finder and select Applications under Favorites**. <u>Click</u> <u>and drag</u> the VMware View Client icon to the Applications window.

7. You are ready to open the VMware View Client from the Applications window. Upon opening the VMware View Client you may receive a warning window asking if you are sure you want to open it. If you are sure, you should select Open. <u>After clicking Open you may receive a window asking to "Start Remote USB and Printing Services".</u> <u>Click Cancel.</u>

 The VMware View Client will open and you will be prompted to add a server. Click the New Server icon in the middle of the window and <u>enter the host name as</u> <u>shown below</u> and select Connect:

	١.,			C	ancel	ogin		

- Please refer to your RSA SecurID app installed on your device. The numbers change every 60 seconds. The numbers in your RSA SecurID app will be entered in the passcode field above. \*\*
- 10. You will then **enter your network username, password** and ensure the correct **domain is selected** and click **Continue**. (Note: this is the same username, password and domain that you use when you are in the office)

11. You will then receive a window similar to the one below. **To connect**, you must **doubleclick the monitor**.

12. <u>When you are done</u> using the virtual desktop, **go to Connection** and **choose either Disconnect** (if you want to leave the existing programs running on the VDI) **or** you can **go to the start button in Windows and choose Restart** (if you are done with everything).

If you have any questions or need additional assistance please contact the VDI Helpdesk at 573-751-1900.
