# How To – Verify VMware Horizon Client version on Windows

Step 1: Click the icon to open the *VMware Horizon Client*.

Step 2: Click the *Menu* icon on the top right of the screen. Click *About VMware Horizon Client*.

Step 3: Verify that the *Version* is at least *2212.1* and the *Build* is at least *8.8.1*

Step 4: If your *Version* or *Build* are below the previous number, please proceed to https://distributedteams.mo.gov/technical-tools/, locate/open the document for *How To – Connecting to a Virtual Desktop on mypc2 with Windows* for instructions on how to install the required minimum version.
